There is evidence everywhere that hordes of Chinese are constantly landed in San Francisco to come here consigned as serfs to the Six Companies, together with hordes of women in a condition of semi-slavery, and the use of the Chinese as a means of making a source of profit by the pursuit of a degrading and demoralizing occupation. In the fact is, that we are not helpless, and we have a remedy. We have the power to legislate, and we have the right to legislate. The Chinese have violated the treaty, and are utterly to be repudiated it. Above all things we must endeavor to discourage rash demonstrations of anything in the nature of mob violence. We must endeavor to legislate, and we must legislate with wisdom and discretion. It is a complex and unenviable task, and it is one which must be met with a steady and gradual. But we think they ought to give us a respectful hearing when we tell them in all sincerity that we are not afraid of them, and that we are steadily increasing evil; that we are fully experienced all the advantages and disadvantages resulting from it; that we have felt our own knowledge and our own danger; that we have watched its operation upon our various trades and industries, and that we realize how disastrous it is now affecting this community in its social

They come consigned as chattels to the various powerful and powerful Companies, consisting of a number of their own race.

"In the light of these undeniable facts, it is folly any that we are ignorant and without a remedy against this appalling danger. The fact is, the remedy is simple and easy. It is in our own hands. The Chinese have violated the treaty, and we are bound to retaliate. It is necessary to discourage rash demonstrations of everything in the nature of mob violence, and to encourage the Chinese to be law-abiding. We must be just and fair, but we must also be firm. It is time that it is complacent and unresponsive; that we are not suddenly enlightened; that the pharisees of our own race are not more enlightened and more just than the heathen. We must not give us a respectful hearing when we tell them in all sincerity that the Chinese immigration is terrible and a steadily increasing evil; that we are suffering from the presence of this immigration, and the advantages resulting from it; that we have felt course, and know its dangers, that we have witnessed the suffering of our Chinese laborers and industries, and that we realize how disastrous it is now affecting this community in its social and industrial life."

A great howl is now raised against Chinese immigration, and a mass meeting will be called to report resolutions memorializing Congress for repeal of the Burlingame treaty, the United States Consul at Hongkong has been informed that such opposition to the influx of the heathens, were unconstitutional. The people have been roused the consideration of this question by the arrival last week of nearly 1,500 Chinamen, and the announcement that all the stowage accommodations on China Steamers had been engaged for the next months.

THE QUESTION IS A SERIOUS ONE, and has been very much discussed upon our official papers, who unite in the belief that something should be done to arrest this immense human wave, which will soon flood our State, The President of the 25th, expressing the views of the majority of our population came out with the following remarks:

"The evidence is overwhelming that hordes of Chinamen are constantly landing in San Francisco Bay, and coming completely unprepared to do the work of the Communities, together with hordes of women in a condition of virtual bondage, imported for the purpose of doing the same kind of work, and in many cases of shameful and demoralizing occupation. It is perfectly well understood that the Chinese emigrants do not come here under the same conditions as immigrants from other countries, they are not induced by money nor do they come from an individual impulse and freedom. They are imported like cattle. They are recruited by agents who do not act in the interests of free men. They come consigned as chattels to wealthy and powerful Companies, consisting of one or more of their own race."

In spite of these undeniable facts, it is folly to say that we are helpless and without a remedy to face this appalling danger. The fact is, that we are not helpless, and we must take action. The Chinese have violated the treaty, and are utterly to repudiate it. Above all things we must endeavor to discourage such demonstrations of everything in the nature of a strike. We must insist that the Chinese shall be suitably enlightened; the process must be suddenly enlightened; the process must necessarily be gradual. But we think they ought to give us a respectful hearing when we tell them in all sincerity that Chinese emigration is terrible and a steadily increasing evil; that we have fully known all the advantages and disadvantages attending their presence in California, and up to the present it seems to me that we have utilized its operation upon our various trade and industries, and that we realize how disastrous would be the effect of restricting their numbers in our social and industrial interests."

The Bourbon Pretender to the Throne of Spain gained a fugitive in France, and has found himself unable to cope with the forces of King Alfonso. Having beaten, he has not yet lost all hopes of regaining the throne through his successors. It really seems foolish to see Don Carlos to the front, smothering his throat with the best blood of the nation, when he could so easily, and so luxuriously live in peace and quiet. Were he a pauper his extravagant pretensions might be accounted for, but he can bask in the happiness of being the possessor of \$8,000,000, which were left to him by the Duke of Modena. With such a plethora of money power, and so little chance of success, his attempts at revolutionizing the country seem almost fool-hardy.

Spain has been the theatre of the most extraordinary events. A fugitive in France, and has found himself unable to cope with the forces of King Alfonso, though beaten, he has not yet lost all hopes of ascending to the throne of his ancestors. It really seems foolish for Don Carlos to be continually menacing his country with the best blood of the nation, when he could so easily, and so luxuriously live in peace and quiet. Were he a pauper his extravagant pretensions might be accounted for, but he is a king in the supplies of being the possessor of 1,000,000, which were left to him by the Duke of Modena. With such a plethora of idle goods, and so little chances of success, his frustrated attempts at revolutionizing the country are not hard-ford.

NOTES.

The *Diario* says the present crop of sugar in Cuba will make about 100,000 boxes, and is valued at 1,000,000 less than last year's crop.

There has been a remarkable decline in the use of silver in Japan. Mexican dollars are two cent below Japanese paper money, and ten cent below gold, which causes great uneasiness in foreign commercial circles.

In China, the fall in exchange and the decrease of the value of silver creates alarm in all open ports.

The first locomotive in China has made a trial run of one mile on the railway near Shanghai.

GLANES.

Reports of heavy floods continue to reach us from the south of Germany, Austria and Hungary. The waters of the upper Elbe have overflowed the banks and caused serious damage and loss of life at places as far as Vienna, Dresden, Magdeburg and the frontiers of Bohemia. The river has on reached the flood marks of 1626, or 1712 and 1824, though not 1784 and 1845."

The present Vesuvius eruptions are exceedingly grand. At present the lava is flowing in a great toward Pompeii. The lava is forming a tremendous column of white vapor hanging over the abyss. The fire in the mountains cast upon the slopes a splendid crimson glow, and the ground is covered with a deep pink. Large quantities of lava are ejected. It is expected that the eruption will be protracted for weeks.

GENERAL SCIENCE.

also resigned as Minister Plenipotentiary to the Court of St. James. Rumors ran current that he was recalled at the request of the British Government, owing to his connection with the Emma mine swindle, but the Secretary of the British Legation at Washington has positively denied the statement. He will appear before the House Committee, and go through the ordeal of an investigation by Senator Stanford and Francis W. Park of Kansas R. fame, are witnesses in the case.

R. Dana Jr., has received the nomination vice Cheuch, but the Senate has as yet failed to confirm the same.

A great howl is now raised against Chinese immigration, and a mass meeting will be called to protest resolutions memorializing Congress for a repeal of the Burlingame treaty, the United States Supreme Court having decided that all State laws relative to the influx of the hordes, were unconstitutional. The people have been roused to the consideration of this question by the arrival last week of nearly 1,500 Chinamen, and the announcement that all the stowage accommodations on China Steamers had been engaged for the next months.

THE QUESTION IS A SERIOUS ONE,

and has been very ably commented upon by our local papers, who unite in the belief that something ought to be done to arrest this immense human flood, which will soon become a veritable plague of the 25th, expressing the views of the majority of our population came out with the following remarks:

"The evidence is overwhelming that hordes of Chinamen are constantly landed in San Francisco to come here consigned as serfs to the Six Companies, together with vast herds of women in conditions of virtual bondage, imported for the purpose being made a source of profit by the pursuit of freedom, and the sale of their children." It is particularly well understood that the Chinese emigrants do not come here under the same conditions as immigrants from Germany or other European countries. They are brought over by the thousands, packed like cattle but they are imported like cattle. They are in the status of serfs and not in the status of freemen. They are sold to the lowest bidder, and wealthy and powerful companies, consisting of one of their own race.

In the light of these undeniable facts, it is folly say that we are helpless and without a remedy the face of this appalling danger. The fact is, remedy is simple and easy. It is in our own hands. We can stop the traffic if we wish. We are at liberty to repulse such invasion. It is necessary to discourage rash demonstrations everything in the nature of mob violence. To give aid to such mobs would be tantamount to giving them a respectable hearing when we tell them in all sincerity that the Chinese migration is terrible and a steadily increasing evil; that we cannot tolerate the introduction of such subjects and advantages resulting from it; that we have felt secure, and know its dangers, that we have witnessed the results of similar invasions in other countries, and that we realize how disastrous it is now affecting this community in its social and industrial interests."

FROM EUROPE.

The Republic of France, the Empire of Austria, and the Republic of Belgium have united to send a deputation of five men, so clearly heard in the last general vote. The majority is largely Republican and the Ministry of Mr. Buffet was compelled to resign. More liberal one was formed by Marshal McMahon, and up to the present it seems to give satisfaction to all classes. Gambetta, the "Indefatigable," has organized a new party called the "Republican Union," which unites under its banner several of the factions in the Assembly.

The Bourbon Pretender to the throne of Spain has again beaten in French waters. He found him unable to cope with the forces of King Alfonso. His greater he has not yet lost all hopes of ascending the throne of his ancestors. It really makes foolish for Don Carlos to be continually menacing his country with the best blood of the nation, when he could so easily, and so luxuriously live in peace and quiet. Were he a pauper his ravaging pretensions might be accounted for, but he can back in the happiness of being king for \$8,000,000, while others were left to him by the Duke of Modena. With such a plethora of idle goods, and so little chances of success, his repeated attempts at revolutionizing the country are fool-hardy.
